DETAILED ACTION

1. The preliminary amendment filed 11-24-03 has been entered. Accordingly, claims 19-27 are pending.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 10/132,248, filed on 04-26-02.

Information Disclosure Statement

3. The information disclosure statement filed 11-24-03 fails to comply with 37 CFR 1.98(a)(1), which requires a list of all patents, publications, or other information submitted for consideration by the Office. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 19-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to

one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 19, the specification fails to provide support for the recitation "said designated terminal couples to said first terminal of said first memory chip and said third terminal of said second memory chip". Similarly, the specification fails to provide support for "said first semiconductor chip has a first terminal pair coupled to said designated terminal pair" in claim 24. The specification only shows in figures 32A and 32B, an SRAM and a flash stacked together without discussing how their terminals are connected as now claimed.
